

TURBO POT

Turbo Aluminum Fry Pans

The aluminum coated and uncoated fry pans feature a full unibody structure that heats up fast and evenly. The robust structure won't warp, and even heating makes for a long lasting nonstick coating.

- Quick heat up and recovery
- Even heating
- Long lasting non-stick coating
- Save on gas bill

Item No.	Item No. (nonstick)	Diameter (in/cm)	Depth (in/cm)	Aluminum Base Thickness (mm)
TPA1002	TPA1002C	8/20.3	1.8/4.5	10
TPA1003	TPA1003C	10/25.4	2/5.1	10
